

PALLET MESH FOR COMPOST FILTER SOCK

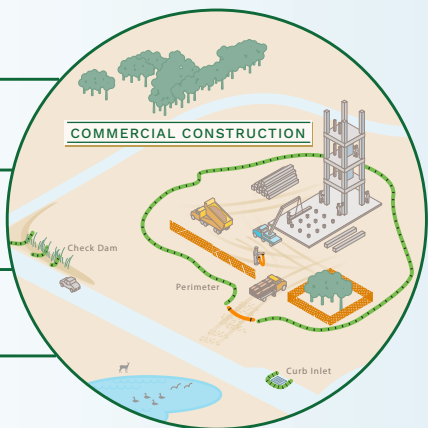

**CONTROLS COSTS WHILE
YOU CONTROL RUNOFF.**

▶ PERIMETERS

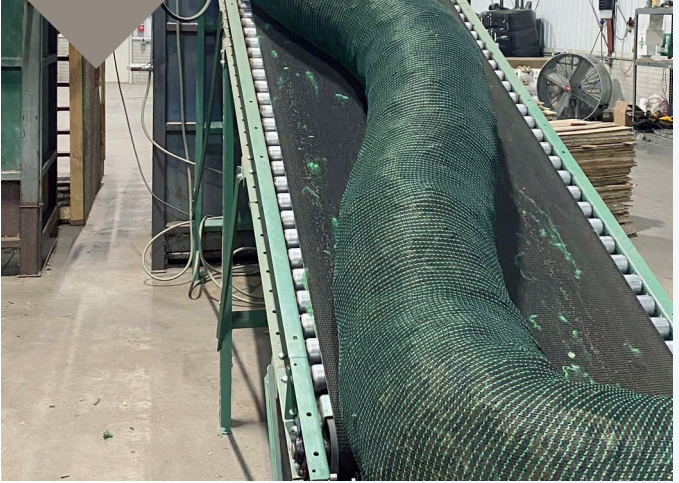

▶ INLETS

▶ DITCHES

▶ SLOPES

POWERED BY FILTREXX™

Powered by Filtrex is a partner program created for erosion control companies that produce their own line of compost filter sock and other BMPs.

The most competitive, advanced, and recognized products in the erosion & sediment control industry are now available for you to manufacture & market.

FILTERS SEDIMENT

ALL NATURAL OPTIONS

FASTER INSTALLATION

No trenching required
Installs 3x faster than silt fence¹

BETTER PERFORMANCE

Superior filtering with third-party tested results²

LESS MAINTENANCE

Stays in place & won't fall down³

QUICKER REMOVAL

Just cut mesh & spread compost

FOR COMPOST FILTER SOCK

Powered by Filtrexx Pallet Mesh meets the durability, strength and longevity needs for all standard sediment control applications. Made in roll lengths to optimize your pre-filled, palletized compost filter sock. Available exclusively to our **Powered by Filtrexx Partners**.

Durable Pallet Mesh

Our standard, light duty mesh can be used for any palletized or pre-filled application.

Durable Plus+ Pallet Mesh

Our original strength mesh is the most widely recognized and used product in the industry.

Extreme Pallet Mesh

Our most durable mesh material is specially designed to withstand the harsh surface conditions of asphalt and concrete. With an extra tough, wear & tear resistant mesh, this product is perfect for urban construction and/or when dealing with rugged conditions.
