

NOTES:

1. Filtrexx® enclosure dimensions and baffle/flow diverter quantities and spacings to be varied as necessary to accommodate site conditions and to meet the design flow rate and hydraulic residence time requirements.
2. Impermeable liner may be required for point-source discharges.
3. All Soxx™ to be seeded per Landscape Architect's specifications.
4. All Filtrexx® Growing Media™ blankets to be seeded per Landscape Architect's specifications.
5. System can be modified for constant (point-source) discharge or intermittent (nonpoint-source, construction, site, etc.) discharges.

FILTREXX® FILTRATION SYSTEM
